Kailun Wang

Full-Stack Software Engineer | Cloud & Mobile | M.Eng @ UMD (May 2026)
Greenbelt, MD · kwang99@umd.edu · https://github.com/UMDKyle

Experience

Software Engineer (.NET / Cloud)

Itlize Inc., New Jersey, USA | Jan 2024 – Jul 2024

- Built production web services supporting **5,000+ monthly users**, improving system reliability and reducing support tickets by **~30%**.
- Designed secure RESTful APIs with token-based authentication and centralized exception handling.
- Optimized Entity Framework queries and database indexing, improving average API response time from **~900ms** to **300ms**.
- Developed reusable Angular components that reduced frontend development time for new features by **~25%.**

Software Developer

AI Made Easy Corp., Maryland, USA | May 2023 – Jan 2024

- Delivered a responsive Vue.js platform that increased user session duration by **~18%** after UI modernization.
- Designed backend APIs powering core workflows, reducing manual processing for internal teams by **~35%.**
- Integrated Stripe payment processing and developed an internal admin panel using Next.js hat cut operational reporting time from hours to minutes.

Android AI Translation Application

AI Made Easy Corp., Maryland, USA | May 2023 – Feb 2024

- Architected a cross-platform React Native application enabling real-time speech translation with **sub-second transcription latency**.
- Integrated OpenAI Whisper and AWS Polly for speech-to-text and text-to-speech workflows.
- Designed a fault-tolerant API layer that improved audio processing success rates to **99%+**

Project

Software Engineer (Mobile / Cloud)

Seray – Mental Health Application | 2025 – Present

- Leading development of a mobile mental-wellness platform designed to strengthen real-world social connections for college students.
- Architected scalable authentication and onboarding infrastructure supporting projected **10k+** student users.
- Implemented event-driven backend workflows that reduced user onboarding friction and improved activation rates.

Human-Computer Interaction Research Project

Future Laboratory, Tsinghua University | Jun 2021 – Sep 2021

- Engineered robot motion algorithms for interactive experiments, improving response accuracy during real-time user interactions.
- Analyzed behavioral data from usability testing to refine system responsiveness.

Education

Master of Engineering in Software Engineering, *University of Maryland – College Park* | May 2026

Bachelor of Science in Computer Science, *The Pennsylvania State University* | May 2023

Technical Skills & Certifications

C#, TypeScript/JavaScript, Python · ASP.NET Core, Angular · Azure, Docker · SQL Server, Entity Framework Core

AWS Certified Cloud Practitioner (CCP)
